

Goto : <https://console.cloud.google.com/>

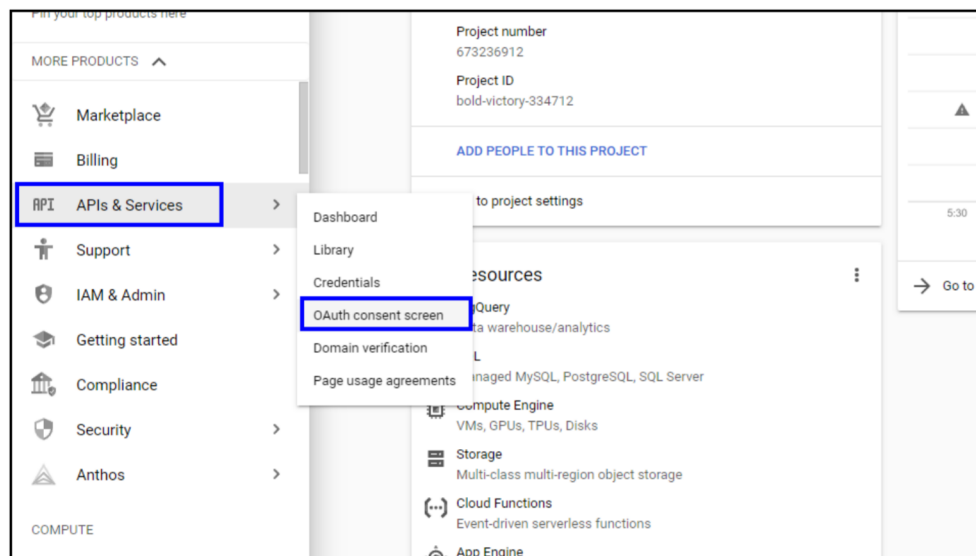

➤ Create new project

➤ Enter details if you want to modify, else click on create button

➤ go to API Services and Choose OAuth consent screen

➤ Choose External and click on create Option

User type

☐ Internal ?

Only available to users within your organization. You will not need to submit your app for verification. [Learn more about user type](#)

☒ External ?

Available to any test user with a Google Account. Your app will start in testing mode and will only be available to users you add to the list of test users. Once your app is ready to push to production, you may need to verify your app. [Learn more about user type](#)

[Let us know what you think](#) about our OAuth experience

[CREATE](#)

➤ Enter App information

OAuth consent screen

Domain verification

Page usage agreements

App information

This shows in the consent screen, and helps end users know who you are and contact you

App name *
nit-sample-test
The name of the app asking for consent

User support email *
javabyraghu@gmail.com
For users to contact you with questions about their consent

App logo [BROWSE](#)
Upload an image, not larger than 1MB on the consent screen that will help users recognize your app. Allowed image formats are JPG, PNG, and BMP. Logos should be square and 120px by 120px for the best results.

App domain

To protect you and your users, Google only allows apps using OAuth to use Authorized Domains. The following information will be shown to your users on the consent screen.

Provide users a link to your public privacy policy

Application terms of service link

Provide users a link to your public terms of service

Authorized domains ?

When a domain is used on the consent screen or in an OAuth client's configuration, it must be pre-registered here. If your app needs to go through verification, please go to the [Google Search Console](#) to check if your domains are authorized. [Learn more](#) about the authorized domain limit.

+ ADD DOMAIN

Developer contact information

Email addresses *

javabyraghu@gmail.com

These email addresses are for Google to notify you about any changes to your project.

SAVE AND CONTINUE CANCEL

- Click on save and continue...
- Click on credentials > Choose CREATE Credentials > Select OAuth client ID

Credentials + CREATE CREDENTIALS DELETE

Create credentials to access your project

API Keys

API key

Identifies your project using a simple API key to check quota and access

OAuth client ID

Requests user consent so your app can access the user's data

Service account

Enables server-to-server, app-level authentication using robot accounts

Help me choose

Asks a few questions to help you decide which type of credential to use

OAuth 2.0 Client IDs

No OAuth clients to display

Service Accounts

No service accounts to display

APIs & Services

← Create OAuth client ID

Application type *
Web application

Name *
Web client 1

The name of your OAuth 2.0 client. This name is only used to identify the client in the console and will not be shown to end users.

The domains of the URIs you add below will be automatically added to your [OAuth consent screen](#) as [authorized domains](#).

Authorized JavaScript origins ⓘ

For use with requests from a browser

URIs *
http://localhost:8081

+ ADD URI

Authorized redirect URIs ⓘ

For use with requests from a web server

URIs *
http://localhost:8081/oauth2/callback/google

+ ADD URI

CREATE CANCEL

➤ After click create button, copy below details

OAuth client created

The client ID and secret can always be accessed from Credentials in APIs & Services

OAuth access is restricted to the [test users](#) listed on your [OAuth consent screen](#)

Your Client ID
673236912-pa1bcvjonjofbp50s3t5mtnf1351cdv.apps.googleusercontent.com

Your Client Secret
